### **REMARKS / SUPPORT FOR PATENTEE'S ASSERTIONS**

Pursuant to 37 C.F.R. §1.322 and MPEP §1480.01, Patentee respectfully submits that all of the errors noted herein are attributable solely to the Office, and respectfully requests a Certificate of Correction be expedited in light of the following evidence of record in the above-noted reissue application.

Claim 1 is being corrected to remedy an error in the placement of the ending bracket for the text as deleted in the May 5, 2005 Amendment filed by patentee. A copy of the May 5, 2005 Amendment is attached as Exhibit 1.

Claim 14 is being corrected to amend a typographical error in the words “proximal” and “communicates.” These words were spelled correctly in the version allowed by the Examiner in the May 5, 2005 Amendment (Exhibit 1).

Allowed dependent claims 15, 16 and 18-22 require a correction to the indicated dependency thereof, and to correct a misspelling of the word “claim” in claim 15. Each of allowed dependent claims 15, 16 and 18-22 were examined as claims 17, 18 and 27, 20, 26, 28 and 29, respectively, and ultimately depended from independent claim 16 during reissue examination. See May 5, 2005 Amendment; Exhibit 1. Upon allowance, the allowed dependent claims were renumbered by the Examiner as claims 15, 16 and 18-22, respectively. A copy of the Index of Claims placed in the file by the Examiner on May 16, 2005, showing the renumbering of these allowed dependent claims, is attached as Exhibit 2.

This request further corrects the omission of claims 23-27, which were allowed by the Examiner, but were not printed on the reissue patent. Specifically, claims 23-27 were submitted in a October 28, 2004 Preliminary Amendment (Exhibit 3) as claims 21-25. These claims were allowed by the Examiner on May 16, 2005 (Exhibit 4), and renumbered as claims 23-27, respectively (see Exhibit 2).

Transmitted herewith is a proposed Certificate of Correction effecting the changes noted herein. Patentee respectfully solicits an expedited granting of a Certificate of Correction pursuant to 37 C.F.R. §1.322 and MPEP §1480.01.

No fee is believed due for this filing as all errors are believed to be attributable solely to the Office. In the event a fee is required, the Patent Office is authorized to charge any fee to Deposit Account No. 04-1073.

Dated: May 19, 2009

**IN THE CLAIMS:**

Please amend the claims as indicated below:

1. (Four Times Amended): A dental implant for insertion in the jaw bone of a patient, comprising:

an elongated body having a longitudinal axis and a proximal surface generally transverse to said longitudinal axis,

a boss extending from said proximal surface, said boss having a transverse face, generally axial extended side surfaces, and a non-round cross section as viewed along said axis,

at least one indentation penetrating [at least one of] said proximal surface of said body and said transverse face of said [implant] boss, said at least one indentation being adapted to engage an insertion device or at least one protrusion of a dental prosthesis or an abutment so as to fix the position of the prosthesis or abutment relative to said implant.

16. (Amended): A dental implant for insertion in the jaw bone of a patient comprising:

an elongated body having a longitudinal axis and an axial hole, said body having a proximal end that terminates in a proximal surface that is generally transverse to said longitudinal axis,

a recess extending into said proximal surface, said recess having a bottom wall including an opening that communicates with said axial hole, and smooth, generally axial extended side surfaces, and

a plurality of slots penetrating said proximal surface and axially extending only part way down said side surfaces toward said bottom wall, said slots being adapted to engage an insertion device or at least one protrusion of a dental prosthesis or abutment so as to fix the position of the abutment or crown relative to said implant.

### REMARKS

This Supplemental Amendment places into proper form the Amendment filed on March 25, 2005. Applicants' attorney respectfully requests that this Supplemental Amendment replace the Amendment filed March 25, 2005. If any extension fees are required, the USPTO is authorized to charge to the attorney's Deposit Account No. 19-2380 any fees due for such extensions.

As required by 37 CFR §1.173(e), the status of the claims is as follows:

Claims 1, 12 and 15	pending original claims amended
Claims 2-11	pending original claims
Claims 13 and 14	canceled original claims
Claims 16-25	new claims amended
Claims 26-29	new claims

Claims 1-12, 15 and 21-25 have been indicated as allowable by the Examiner in previous Office Actions. This Amendment corrects a minor typographical error in claim 1 by deleting "of," and further amends claims 16-20 to define around the prior art, as discussed in detail below.

The rejection of the claims under 37 CFR § 1.175(B)(1) has been obviated by the filing of a Supplemental Reissue Declaration via facsimile on January 6, 2005. An additional Supplemental Reissue Declaration signed by both inventors will be filed in a Supplemental Response to cover the presently amended claims.

Applicant's attorney acknowledges with gratitude the interview granted by Examiner O'Connor and held on March 22, 2005. The claims have been amended in conformance with a suggestion made by the Examiner at the interview as to how to render them patentable over the prior art of record. In particular, claim 16 now recites a dental implant for insertion into

U.S. Serial No. 09/667,827  
Amendment Under 37 CFR 1.173(b)(2)

the jaw bone of a patient that comprises an elongated body, a longitudinal axis and an axial hole and a proximal surface generally transverse to said longitudinal axis and a recess extending into the proximal surface, and

"a plurality of slots penetrating said proximal surface and axially extending only part of way down said side surfaces toward said bottom wall, ..."

Claim 16 now defines over the Gersberg '892 patent, whose striations 8 in the cylindrical cavity of the implant extend all the way to the bottom wall of the cavity.

Support for amended claim 16 is present in column 13, lines 58-65 in combination with column 10, lines 16-20. These portions of the specification are reproduced herein below for the convenience of the Examiner. Column 13, lines 58-65 reads as follows:

It should also be understood that a reversal of features is intended to fall within the inventions scope. Thus any boss cross-section which has been described as protruding from the flange surface 44 may also be formed (and viewed in the Figures) as a recess in the surface 44. In such a construction the mating crown or abutment is fabricated with a correspondingly shaped protrusion (or protrusions) that seat(s) in the recess (or recesses). (Emphasis added.)

Column 10, lines 16-20 reads as follows:

The slot 94' may penetrate in depth into the upper surface 100 of the boss 92, as illustrated with the solid lines in FIG. 10a. On the other hand, the slot depth may be extended (not shown) substantially, even into the flange 45, that is, below the surface 44 of the flange 45. (Emphasis added.)

Reading these two sections of the specification together, if the boss 92 is viewed as a recess, it is clear that the slots 94' do not have to penetrate the entire length of the recess, since they

for Reissue Application  
Response to OA dated Jan. 14, 2005

do not have to penetrate the entire length of the boss. Thus, amended claim 16 is well supported by the specification.

As the Kwan '197 and Krauser '475 patents were cited for features which have been deleted from claim 16, no further discussion of these references is deemed necessary.

Claims 17-20 and new claims 26-29 are patentable at least by reason of their dependency upon amended claim 16.

Now that all the claims are believed to be allowable, the prompt issuance of a Notice of Allowability is hereby earnestly solicited.

The Commissioner is authorized to charge any deficiencies or credit any overpayment to Deposit Account No. 19-2380 (099488-2).

**REQUEST FOR CERTIFICATE OF CORRECTION  
PURSUANT TO 37 C.F.R. § 1.323**

Attention: Certificate of Correction Branch  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Madam:

Upon reviewing the above-identified reissue patent, Patentee noted a typographical error which should be corrected.

**In the claims:**

In claim 17, line 29, please delete "*A dental implant as in claim 16,*" and replace with  
--*A dental implant as in claim 15,*--.

The inadvertent typographical error in the dependency of reissued claim 17 was found in the Amendment as filed by applicant on May 5, 2005. Specifically, in the May 5, 2005 Amendment, applicant indicated that pending claim 19 (which was renumbered as reissued claim 17) should depend from pending claim 16 (which was renumbered as reissued claim 14). However, pending claim 19 should have depended from pending claim 17 (which was renumbered as reissued claim 15).

Please charge our Credit Card in the amount of \$100.00 covering the fee set forth in 37 C.F.R. § 1.20(a). Credit Card Payment Form SB-2038 is transmitted herewith.

The error now sought to be corrected is an inadvertent typographical error the correction of which does not involve new matter or require reexamination.

Transmitted herewith is a proposed Certificate of Correction effecting such amendment. Patentee respectfully solicits the granting of the requested Certificate of Correction.

The Director is hereby authorized to charge any deficiency in the fees filed, asserted to be filed or which should have been filed herewith (or with any paper hereafter filed in this application by this firm) to our Deposit Account No. 04-1073.
